Lamination

Laminating your digital print's is often an overlooked element of printing, here are 5 good reasons to over laminate your prints: 1. Protect against UV rays, 2. Guards against scratching, 3. Stops Moisture, 4. Inhibits dust, 5. Protects against fingerprints. Laminating your digital prints also protects the ink/print from any grime or scratches. Laminated prints are safer to wash, clean and wipe away than non-laminated prints.

Graphic & Artwork Design not included in these Price List, prices are based on supplied artwork ready for print. For Graphic & Artwork Design, additional charges apply. For signs fitting and installation, Contact Us.
